Web Project

A)jQuery plugins/UI:

1) added a **dialog** at the opening of the circuit page to prevent the user from getting bored and increase the interaction.

2) added **tabs** to the pages to avoid the similarity of the pages. Incule in circuits page and used for show different tracks.

3)Contact us jQuery check user blank input areas. Also check Valid email adresses and Race section make a suggestion for the user when typing.

4) added random changing background color button just for fun and increase the interest.

5) **Fotorama**:

Fotorama used for add slide photos and added caption of photos. Also add autoplay and loop of the photos. Used in home/index page

6) **EvoCalendar**:

Add calendar plugin for race calendar. In the calendar also I show test dates and qualif day. from now on i will add the vehicle presentation days. Used In home/index page

7)Ajax:

In Legends Page take every legends information and photos from json files.

In index page take f1 tagged photos from /www.flickr.com site and use fotorama features to Show photos (like loop)

B) In this websites I want to make a formula1 news page but my page is not only for the news but also who new in formula1 will be able to see the formula 1 legends and tracks. Next I will add some forum pages for people talk each other. But know people only send to admin for race comments after that admin added comments.

My page is different for other pages. Other pages is use only the Daily news and features. New fans of formula1 cannot see the very important people and tracks that dont used for this days.
